

1. Project Overview

5Pets is a modern, full-stack web application designed to centralize pet trading on a single platform. It aims to create a seamless, secure, and interactive experience for both pet buyers and sellers.

2. Business Goals / Objectives

- **Provide a seamless digital experience:** Interactive and responsive frontend allowing users to access information and services in real time.
- **Ensure trustworthy listings:** Transparency and authenticity of pets are verified to build user trust.
- **Offer robust management tools:** Sellers can efficiently manage listings, while buyers can track transactions and communicate easily.

3. Target Users / Market

- **Pet Buyers:** Individuals or families looking to purchase pets such as dogs, cats, birds, rabbits, hamsters, or ornamental fish.
- **Pet Sellers:** Local pet stores, breeders, or individuals selling pets online who need a professional and secure platform.

Market Opportunity:

- Rapid growth in pet ownership globally.
- Increased online transactions in the pet market due to convenience and accessibility.
- Rising demand for reliable, secure, and centralized online platforms for pet trading.

4. Stakeholders

STT	Stakeholder	Description
1	Seller/Admin	Manage the entire system: add/edit/delete pets and categories; manage orders; manage new admin accounts.
2	Buyer/Client	Clients access the website to view pets, search, add items to the cart, place orders, and track their orders.
3	Email Service	Send OTP and order notifications to customers.
4	Payment Gateway	Handle online payments, ensuring secure transactions.

5. Success Criteria

- High user adoption by buyers and sellers.
- Verified and trustworthy pet listings.
- Seamless user experience with minimal technical issues.
